

SANSKAR JAIN

SOFTWARE DEVELOPER

+91 - 7231878863 | sanskarjain2001@outlook.com | <https://www.linkedin.com/in/jainsanskar>

MCA student with hands-on experience shipping full-stack products end-to-end — from architecture to deployment. Comfortable owning backend services in Java/Spring Boot, building responsive frontends with Next.js, and wrangling IoT sensor pipelines in Python. Led two real-world client projects and built a sub-₹3K health wearable prototype.

SKILLS

Languages	Java · JavaScript · Python · SQL
Backend	Spring Boot · REST APIs · Microservices · MongoDB
Frontend	Next.js · React · HTML/CSS · Shopify
Data & AI	Power BI · AI/ML basics · Data Visualization
Tools	Git · Linux · XAMPP · IoT Sensors

EXPERIENCE

Prekies Babycare - Website & Technical Head

Feb`26 - Present

- Designed and developed the company website from scratch, ensuring a responsive and user-friendly interface
- Led end-to-end website development, including planning, UI/UX structuring, and deployment
- Implemented key features such as product showcasing, navigation optimization, and performance improvements

Karwaanfilms.com - Project Lead

July`23 - Jan`24

- Led a talented team to develop karwaanfilms.com, a platform curating human-centric documentaries, photos, and videos using Next.js (Frontend) and MongoDB (Backend). Coordinated testing and validation, ensuring compliance with industry standards.
- Fostered a cohesive team environment, driving creativity and innovation to meet project milestones successfully.
- Oversaw end-to-end development, ensuring a scalable, high-performance platform with an intuitive user experience.

PROJECTS

Tripwise - AI Powered Travel Planning Platform

- Designed and launched an AI-based travel assistant to simplify trip planning with curated itineraries and suggestions.
- Integrated smart recommendations for destinations, activities, and routes to enhance trip efficiency and user experience.

Smart Health Monitoring Band

- Designed and built a wearable prototype under ₹3000 capable of monitoring key health metrics like heart rate, temperature, and motion using IoT sensors, to enable users of all ages in India to monitor their health and collected & analyzed IoT sensor data to identify trends using Python and SQL.

EDUCATION

Masters of Computer Application

Amity University

Bachelor of Computer Application

Guru Gobind Singh Indraprastha University
